

PLANTING POPCORN

FILL A PLASTIC CONTAINER HALFWAY WITH SOIL.

PLACE ONE KERNEL OF CORN IN IT, COVER WITH PLASTIC WRAP AND A RUBBER BAND AND PLACE ON A SUNNY SILL.

AFTER A FEW DAYS THE KERNEL WILL HAVE COME ALIVE! IT WILL REACH OUT OF ITSELF AND FEEL FOR THE MOIST SOIL IN THE CONTAINER.

AFTER A WEEK OR SO, THE KERNEL WILL HAVE BEGUN TO ROOT, AND SOON IT WILL ANCHOR ITSELF FIRMLY IN THE SOIL.

THEN THE FRESH GREEN SHOOT WILL REACH UP AND UP...

UNTIL YOU'LL HAVE TO REMOVE THE COVER TO GIVE IT ROOM TO GROW!
